

EXTENDED RANGE™ Single Joint Elevator

Key Benefits and Features

- No adjustments required to handle flush OD, upset, or coupled connections for a given pipe size
- No additional installation/removal time versus standard single joint elevators
- Dual hinge design allows elevator to be opened from either side
- 10 Short Ton safe working load
- Manual operation

Use in the following applications:

Deepwater and ultra-deepwater

Shelf

Land

Frank's EXTENDED RANGE™ Single Joint Elevator (XRSJE) is designed to all casing connection types - coupled, flush, and upset - without modifications to the elevator's internal bore size. The XRSJE line of tools is compatible with casing sizes from 4 1/2 inches to 16 inches and is rated for 10 short tons. Self-adjustability allows the XRSJE to accommodate premium casing connections, saving our customers time and money.
